Avista
ACOUSTIC PANELS

Avista Acoustic Panels are suitable for all decorative and acoustic applications and provides a stylish modern finish to your project while offering excellent acoustic insulation and a maintenance free wall, ceiling lining solution, with an extensive range of patterns and finishes to suit every application.

We are an Australian owned company with state of the art machinery at our Sydney factory. Our mission is to bring you the widest range of made to order products.

DESIGN

Our range of decorative acoustic wall and ceiling panels allows you to customise your design by choosing from a range of optional patterns, finishes and applications or with our Sydney based factory creating your own style.

FINISHES

Specify a finish from our extensive range of:

- Prefinished colours and timbers
- Polyurethane
- Veneer
- Textile/Fabrics

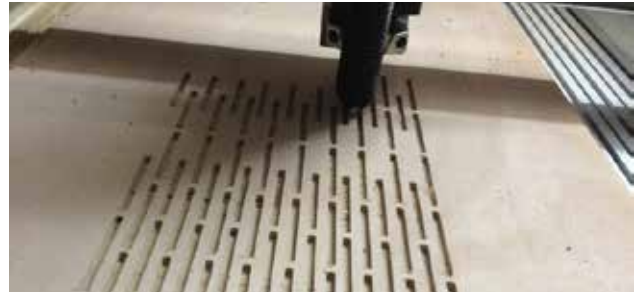

ACOUSTIC BACKING

A non-woven acoustic textile, or further acoustic sound absorbers can be added to provide more acoustic value and hide existing services.

CUSTOM PANEL DESIGNS

Choose from a range of standard slot patterns or create your own, whether it's curved lines, circles, crosses or even a logo

SUBSTRATE

Artevista standard panels used are fabricated from high quality E0 MDF (standard). These panels are hard wearing and provide a resilient alternative to standard wall and ceiling lining products, making them ideal for high traffic and high activity areas.

FIXING

Artevista Acoustic wall and ceiling panelling is generally fixed into position using conceal fixed 12mm split batten system as a standard or subsuspension system
