

# artevista<sup>®</sup>

Avista Beams are a great way to add an acoustic baffle treatment to the room while only partially covering the ceiling. The Beams are suspended horizontal and the surface area exposed for sound absorption creating a feature to hide existing services.

# Avista Beams can be customised to a wide range of unique shapes and various thicknesses with the option of profile cutting for visual impact.

## DESIGN

Beams are a decorative and functional ceiling Acoustic system. A wide variety of unique shapes, in optional sizes are available and custom profiles.

## FINISHES

The beams are available in a number of patterns and finishes including Lamiwood, Acoustic beams, Aluminum beams, Polyurethane colours, Ply or Veneer finishes.

## ACOUSTIC BACKING

A non-woven acoustic textile, or further acoustic sound absorbers can be added to provide more acoustic value and hide existing services.

## CUSTOMISATION

Avista can customise any configuration, material substrate, and profile cut geometry patterns, creating an architectural feature.

## FIXING

Avista Beams are supplied with industry standard ceiling suspension and direct fixing systems, either installed by us or onsite contractors
